

Maintenance Tech

Job description

Mack Morris Heating and Air Conditioning has been in business since 1985. We are still growing, and we are looking for a few good people wanting to learn HVAC and to grow with us.

- Will be working in residential homes. Must be able to pass drug screen, clean driving record, work occasional Saturdays. Must be able to lift 50+ pounds, crawl/bend frequently. Overhead work required. Work in small places such as attics and crawlspaces.
- HVAC experience or knowledge of the industry is preferred, but if not, the maintenance technician will be given hands on training from one of our top maintenance technicians.
- Maintenance tech will learn to clean and maintain heat pumps, gas furnaces, air conditioners and Mitsubishi mini splits.
- Understand company pricing and generate appropriate customer invoice at job site, electronically process credit card payments and obtain customer signature at completion of the job.
- Have a valid Driver's license and clean driving record.
- Must be able to work as a team and put the customer first.
- Good communication skills
- Be able to run maintenance on weekends on a rotating schedule with the other maintenance technicians.
- Have a well-groomed appearance, adhere to company dress code and be self-motivated.
- Punctuality and regular attendance is a must.
- High school diploma or equivalent.
- Apprenticeship program is available.

Benefits

Commissions, Medical, Earned Vacation time, paid off major holidays, and company vehicle to be driven to and from work.
