

Service technician

Job description

Mack Morris Heating and Air Conditioning has been in business since 1985. We are still growing, and we are looking for a few good service techs to grow with us.

- Be knowledgeable with most brands of residential Heat Pumps, Gas Furnaces, and oil Furnaces.
- Understand how to install, maintain, and repair heating, ventilation and cooling units for residential customers.
- Good understanding of Humidifiers, Dehumidifiers, and indoor air quality.
- Be able to diagnose and repair the electronic mechanical and electrical components of these systems.
- Understand company pricing and generate appropriate customer invoice at job site, electronically process credit card payments and obtain customer signature at completion of the job.
- Have a valid Driver's license and clean driving record.
- Must be able to work as a team and put the customer first.
- Good communication skills
- Be able to run ON CALL, nights and weekends on a rotating schedule and be able to run service calls after regular working hours if needed.
- Have a well-groomed appearance, adhere to company dress code and be self-motivated.
- Must have a type I and type II Refrigeration certification.
- Punctuality and regular attendance are a must.
- High school diploma or equivalent and 2+ year in the HVAC trade experience.

Benefits

Medical, Earned Vacation time, paid off major holidays, and company vehicle to be driven to and from work.
